

## High Performance Materials, Design and Construction

Style Crest® entered the step  
manufacturing industry in 1970.

Our first generation of steps  
were redesigned to further  
enhance durability, safety  
and appearance. After many  
months of engineering and  
testing, Style Crest introduced  
the DuraGrip™ II. The second  
generation of Style Crest  
Steps. This innovative design  
places Style Crest as a leader  
in Step Manufacturing. Today  
Style Crest Steps set the  
standard that all others are  
trying to achieve.
